## OBJECTIVE

Computer Science student specializing in **web development** and **AI automation**. Passionate about the intersection of **software engineering** and **digital education**, seeking an internship to apply technical skills toward solving complex, real-world challenges.

## EDUCATION

### University of the East — Manila Campus

2024 – Present

Bachelor of Science in Computer Science

Expected Graduation: 2028

- Relevant Coursework: Data Structures, Object-Oriented Programming, System Design, Database Management, Software Engineering

## SKILLS

**Languages:** Python, Java, C++, SQL, R   **Web:** HTML, CSS, Bootstrap 5   **Tools:** n8n, Google Calendar API, AI Automation

**Practices:** OOP, System Design, WBS, QA Testing

## PROJECTS

### Codebreak — Educational Dungeon Game

2026

Team Leader | Tech Stack: Python, HTML, CSS University of the East

- Leading a team of 5 to develop a dungeon-based game that teaches Python programming concepts through interactive gameplay
- Currently in the design phase; defined and selected the tech stack to ensure scalability and learning value
- Applying agile planning and Work Breakdown Structure (WBS) to manage milestones and deliverables

### Point of Sale (POS) System

2025

Developer | C++ University of the East

- Developed a fully functional POS system using Object-Oriented Programming (OOP) principles
- Implemented 2 transaction types (cash sales and returns) with full inventory management and receipt generation
- Designed role-based access for 2 user roles (Cashier and Admin) with authentication and session handling

### Personal Portfolio Website

2026

Developer | HTML, CSS Personal Project

- Designed and developed a personal portfolio website to showcase academic projects, technical skills, and achievements

### Verif-AI Website 2026 – Present

Developer | Web Technologies Personal Project

- Building a multi-page content website featuring 8 writers producing 10 articles each (80+ articles) on AI-generated media
- Applying content architecture and UI design principles for an engaging user experience

### AI Automation — n8n Local Workflow

2026

Developer | n8n, Google Calendar API Personal Project

- Built an automation workflow that syncs quizzes and subject deadlines from UE Canvas to Google Calendar across all enrolled subjects
- Eliminated manual checking every **1–2 hours**, streamlining academic task management through scheduled API triggers
- Gained practical experience in API integration, automation design, and productivity tooling

## CERTIFICATIONS

Python, C++, OOP, SQL —

CodeChum (2025)

## ACTIVITIES & LEADERSHIP

### UE Hackathon — Participant

2025

University of the East, Manila Campus

- Participated in a university-level hackathon as a 1st-year student for hands-on experience in competitive tech problem-solving
- Co-developed 'TypeRace' — a competitive typing game that helps students actively engage with lecture material by typing content in real time to promote active learning
